Using App Cloner you can create and install multiple copies of your existing apps. App Cloner is the only multi-account app that creates true, independent, installable clones. Follow @AppCloner on Twitter [twitter.com/AppCloner](https://twitter.com/AppCloner) to get notified about new features and updates. Visit the App Cloner Blog at [appcloner.blog](https://appcloner.blog). DESCRIPTION Please read about the incompatibilities below. You can get in touch at [support@appcloner.app](mailto:support@appcloner.app). We're happy to provide support and answer your questions. Cloned apps run in parallel and work independently from their original apps. They will not receive automatic updates so you can keep and run a stable version alongside the original app. App cloning can be useful to simultaneously use multiple logins in apps such as Facebook, Instagram or Twitter but the real fun starts by messing around with an app. App Cloner offers a multitude of modding options to tweak the new app copy. You can change the app name and icon. You can remove permissions or allow a cloned app to be installed on the SD-card. You can disable auto-start and wake locks. Or convert your app into a floating window app. App Cloner can extend a cloned app to add functionality such as password protection, incognito mode, hiding the Android ID or spoofing locations. You can also force the app to consume data over Wi-Fi only. There are over 200 app customization options and each update will add more. PREMIUM VERSION FEATURES The free version allows basic cloning. Upgrade to premium to enjoy the full set of premium options: • Clone premium apps (Messenger, Gmail, Fake GPS apps, Bukalapak, GBWhatsApp, YoWhatsApp, VK, Parallel Space) • Create multiple app clones & use batch cloning • Save cloned apps • Replace launcher icons • Clone watch apps & watch faces Privacy options: • Password-protect apps, including Stealth mode • Disable access to contacts, calendar, call log & clipboard • Exclude app from recents • Incognito mode for apps • Exit app on screen off • Change Android ID, hide / random IMEI / IMSI, Wi-Fi & Bluetooth MAC • Randomize build props to prevent device fingerprinting • Hide Wi-Fi info, hide SIM & operator info • Remove permissions & disable permission prompts • Prevent screenshots • Spoof GPS location • Fake date • Hide root • Disable auto-fill • In-app floating keyboard Display options: • Change status, navigation and toolbar colors • Change the rotation lock • Modify views & replace text on screen • Change the app display size, language & default font • Keep screen on, immersive mode • Floating apps & free-form windows • Multi-window & picture-in-picture support • Hide notch & use larger aspect ratios Media options: • Mute volume on start • Disable cameras & mic • Disable Chromecast button • Fake camera • Disable haptic feedback Navigation options: • Floating Back button • Confirm app exit • Shake to exit app • Long-press Back & fingerprint sensor actions • Volume key actions • Block activities Storage options: • Install app to SD-card • Disable photo & media access • Redirect external storage • Prevent app backup • Bundle OBB expansion files, SD-card directories or exported app data • Clear cache on app exit Launching options: • Remove widgets & launcher icon • Add internal activities as launcher icons • Disable auto-start • Disable app defaults • Disable background services • Disable wake locks • Start / exit app for S-pen, headphone or power events Networking options: • Disable mobile data, background networking & networking without VPN • Disable all networking • SOCKS proxy • Disable clear-text networking • Trust all certificates Notification options: • Notification filter & notification quiet time • Silence notifications & change vibration • Snooze notifications & notification timeout • Change notification color & lights • Change notification visibility & priority • Remove & replace notification icons & actions • Change notification text & categories Android TV & Wear OS options: • Android TV launcher support • Joystick pointer for incompatible apps • Use TV version on mobile devices • Remove & make watch apps Automation options: • Set brightness on start • Do not Disturb, Wi-Fi, Bluetooth & auto-rotate controls • Execute Tasker tasks • Auto-press buttons Developer options: • Change app version name & code • Make app debuggable • Logcat viewer • Change Target SDK version, Android version & build props • App valid from / until • Custom permissions INCOMPATIBILITIES Not all apps can be cloned! Cloned apps may crash, show errors or work incorrectly. Features that depend on the app certificate like Google logins, Google Play Services, Google Play Games, Google Drive backup or in-app purchases WILL NOT WORK! Cloning an app will change its certificate, which means the clone may not work in case the app validates the certificate or uses advanced copy-protection. Some apps that CANNOT be cloned: • AliExpress • Dana • eBay (still works before Android 8.0) • Evernote • GCash • Grab • Kodi • Lazada • LINE (LINE 8.11.0 still works) • OneDrive • Pokemon GO • Skype for Business • Snapchat • Trello • Viber (only Viber 7.9.6.22 works) • WeChat • WhatsApp (please clone GBWhatsApp or YoWhatsApp instead) • Most Google apps (however, Chrome, Gmail & YouTube work fine with some limitations) • Most Microsoft apps (however, Skype & LinkedIn work fine) Use 'Report app issue' to report a problem with a cloned app. To install the clones from your device you need to enable Settings > Security > Unknown sources. If the Install button is disabled or doesn't click, you must temporarily disable overlay apps such as chat heads, blue light filters or floating widgets. You can enable the App Cloner Install Service to fully automate app installations (see Settings). Anti-virus apps may show warnings for cloned apps. These warnings are false positives and can be ignored. They are caused by the unofficial certificate used to sign clones. The premium version supports 20 clones. You may donate to support development and unlock up to 1000 clones. All donations & the commercial use package require the premium version. Some more intrusive options and features are linked to certain donations. All product and brand names mentioned above are property of their respective owners. Click Here to Start Download No wait time for you! Download right away. 0 secs The App Cloner latest APK 2.14.9 (22082413) is one of the great app, which will be useful to clone the app. As its name, the app could be used to duplicate any app in the smartphone and the cloned-app will work independently, so users do not need to worry because there will be no crash in running the app. This app is developed by App Listo and get 4.1 rating point in Google Play, which shows that users love the app. App Cloner File Information Last updated: August 25, 2022 Developer: App Listo Version: 2.14.9 (22082413) Requirement: Android 4.0.3 and up File size: 31.6 MB Uploaded: August 25, 2022 at 12:25PM GMT+07 MD5: ca90fb8c9a76616fb210448f983d0dfa SHA1: a252f17e961e482a440ce4120932e94b765711c6 App Cloner app review This app is special by the detail of its features. By using this app, users will be easy in getting the double app inside their smartphone. They will be freely duplicate WhatsApp, BBM or other apps. This app is nice by its interface. The interface is very simple and clean by the combination of bright blue and white in its basic color scheme. By the simple interface, menus of app are easy to be understood. However, users still have chance to change the theme of the app. The main usage of this app is to clone apps. Here, users will get access to duplicate apps, such as Messenger, WhatsApp and others. Then, they are also free to save or share the cloned apps to others. Although the app is cloned, the main and the cloned apps could run well. It means that it works independently. To show more shortcut we can use QuickShortcutMaker on Android. The App Cloner also provide more privacy options for the users. Here, there are some privacy options to use, such as incognito mode, password protect, Android ID hider, and others. This feature is very useful and users won't be disturbed by others. By the great features, it is right for you to download App Cloner for android. ChangeLog
